

SEEK WANDER

Legal & Compliance Architecture

ZenithAI Corporate Data Room — “The Shield” Folder

CONFIDENTIAL — FOR M&A DUE DILIGENCE & AFFILIATE PROGRAMME REVIEW ONLY

Document Version 1.0 · March 2026 · Prepared by ZenithAI Legal & Compliance Function

PURPOSE OF THIS DOCUMENT

This document constitutes the definitive legal and compliance summary for Seek Wander, a luxury AI travel concierge product developed and operated by ZenithAI. It is prepared for review by M&A; counsel, prospective acquirers, and affiliate programme compliance teams (including Booking.com Partner Hub and Viator Affiliate Programme). It consolidates the product’s corporate ownership structure, Terms of Service framework, privacy and data handling posture, FTC disclosure strategy, and third-party vendor Acceptable Use Policy compliance into a single authoritative reference.

TABLE OF CONTENTS

- 1. Corporate Entity & Intellectual Property Ownership
- 2. Terms of Service — Core Clauses
- 3. Privacy & Cookie Policy — Data Handling Architecture
- 4. FTC Affiliate Disclosure Strategy
- 5. Vendor Acceptable Use Policy Compliance
- 6. Compliance Certification Matrix

01 CORPORATE ENTITY & INTELLECTUAL PROPERTY OWNERSHIP

1.1 Entity Profile

Field	Detail
Parent Entity	ZenithAI
Product Name	Seek Wander
Product Tagline	Curated Luxury Journeys
Entity Type	[PLACEHOLDER — e.g., LLC / C-Corp]
State of Incorporation	[PLACEHOLDER — e.g., Delaware, USA]
Date of Inception	[PLACEHOLDER — e.g., Q4 2025]
Registered Agent	[PLACEHOLDER]
Primary Business Address	[PLACEHOLDER]
EIN / Tax ID	[PLACEHOLDER]

1.2 Parent-Product Relationship

Seek Wander is a wholly-owned commercial product of **ZenithAI**, the parent operating entity. The product operates under the ZenithAI corporate umbrella and does not constitute a separate legal entity. All contractual relationships with third-party vendors, affiliate networks, and payment processors are entered into by ZenithAI on behalf of the Seek Wander product.

For the avoidance of doubt: Seek Wander is a **product brand**, not a legal entity. All liabilities, obligations, and rights vest in **ZenithAI**. Any future corporate restructuring would require formal assignment agreements for all third-party contracts and IP listed herein.

1.3 Intellectual Property Ownership

1.3.1 Proprietary Codebase

Asset	Description	Ownership
Application Source Code	Next.js 14 App Router TypeScript codebase — all routes, components, hooks, server actions, and API handlers	ZenithAI — All Rights Reserved
AI Prompt Engineering	buildPrompt() function, SYSTEM_PROMPT injection defence constant, and all Anthropic message construction logic	ZenithAI — Trade Secret
Data Pipeline Logic	enrichPlace() PlaceCache-first enrichment, Haversine transit, parseOpenNow() algorithm, normalizeDayPlan() backward-compat shim	ZenithAI — All Rights Reserved
Cost Observability Layer	GenerationMeta assembly, CostLog schema, /admin/metrics BI dashboard	ZenithAI — All Rights Reserved
PWA Infrastructure	Servist service worker (sw.ts), offline caching strategy, manifest.ts	ZenithAI — All Rights Reserved
Database Schema	Prisma schema: Trip, PlaceCache, CostLog models (Supabase/PostgreSQL)	ZenithAI — All Rights Reserved

1.3.2 Automated Workflow Systems

ZenithAI owns all proprietary automation workflows, including: n8n content automation pipelines, Vercel Cron Jobs (scheduled database garbage-collection worker /api/cron/cleanup and future operational jobs), and automated email onboarding and re-engagement sequences.

1.3.3 Brand & UI/UX Design Assets

- The **Seek Wander** wordmark and product name.
- The “**Curated Luxury Journeys**” tagline.
- Complete design system: colour palette, typographic system (Cormorant Garamond / DM Sans), component library, and all UI/UX compositions.
- All editorial copy, tone-of-voice guidelines, and brand positioning frameworks.

1.3.4 Third-Party IP — Usage Rights Only

Asset	Owner	Licence Basis
Claude claude-sonnet-4-6 (Anthropic API)	Anthropic, PBC	API Terms of Service — usage licence
Google Maps JavaScript API	Google LLC	Google Maps Platform Terms of Service

Asset	Owner	Licence Basis
Google Places API	Google LLC	Google Maps Platform Terms of Service
Clerk Authentication SDK	Clerk, Inc.	SaaS subscription licence
Supabase (PostgreSQL infrastructure)	Supabase Inc.	SaaS subscription licence
Vercel (deployment infrastructure)	Vercel Inc.	SaaS subscription licence
Cormorant Garamond typeface	Christian Thalmann (Google Fonts)	SIL Open Font Licence 1.1
DM Sans typeface	Colophon Foundry (Google Fonts)	SIL Open Font Licence 1.1

Note: No GPL-licensed code is incorporated into the production application. A complete Software Bill of Materials (SBOM) is available upon request during due diligence.

02 TERMS OF SERVICE — CORE CLAUSES

The following section defines the mandatory clause framework for the Seek Wander Terms of Service. A complete, attorney-reviewed ToS document is maintained separately and governs the live product. This section serves as a compliance summary for Data Room review.

2.1 AI Output Disclaimer

Clause Intent: To disclaim liability arising from the inherent limitations of large language model output in a real-world travel context.

Mandatory Language: *Seek Wander uses advanced artificial intelligence to generate personalised travel itineraries. While every effort is made to provide accurate, current, and relevant recommendations, **ZenithAI does not warrant or guarantee** the absolute accuracy, completeness, timeliness, or fitness for a particular purpose of any AI-generated content, including but not limited to: venue opening hours, admission prices, restaurant availability, safety conditions, visa requirements, and travel advisories. Users are solely responsible for independently verifying all itinerary details prior to travel.*

Risk Coverage: Pricing changes, venue closures, incorrect coordinates, outdated hours, seasonal unavailability.

2.2 Digital Media Product & Travel Agent Liability Waiver

Clause Intent: To establish unambiguously that Seek Wander is a digital software/media product and not a licensed travel agency, tour operator, or booking intermediary. Protects ZenithAI from liability for downstream travel disruptions.

Mandatory Language: *Seek Wander is a **digital media and software product**. ZenithAI is not a licensed travel agency, tour operator, booking agent, or travel adviser under applicable law. We do not sell, book, or fulfil travel services directly. Outbound links to third-party booking platforms direct users to independent platforms governed by their own terms. ZenithAI expressly disclaims all liability for: cancelled or delayed flights; hotel service failures; tour operator cancellations; personal injury; force majeure events; visa or entry refusals; or any travel disruption arising from third-party platforms.*

Affiliate Programme Relevance: Required by Booking.com and Viator affiliate agreements, which mandate publishers disclaim any direct booking or agency relationship.

2.3 User Conduct & Prohibited Activities

- **Automated Scraping:** Use of bots, crawlers, or scripts to systematically extract Seek Wander content, itinerary output, or UI elements.
- **Prompt Reverse Engineering:** Any attempt to probe, extract, reconstruct, or reverse-engineer system prompts, model parameters, or AI instruction architecture.
- **API Abuse:** Automated or high-frequency programmatic calls to any Seek Wander API endpoint outside normal interactive browser usage.
- **Commercial Republication:** Reproducing or commercially exploiting AI-generated itinerary output without express written consent from ZenithAI.

- **Prompt Injection:** Deliberately embedding adversarial instructions within user-controlled input fields to manipulate or extract system-level AI behaviour.
- **Account Sharing / Credential Abuse:** Sharing authenticated accounts or circumventing usage limits through multiple account creation.

Enforcement: Rate limiting (Upstash Redis slidingWindow — Phase 9), Clerk authentication, Zod schema validation, and system-prompt injection defence at the Anthropic API layer.

■ **PLACEHOLDER:** *Section 2.4 — Governing Law & Dispute Resolution: State/jurisdiction, arbitration clause, class action waiver*

■ **PLACEHOLDER:** *Section 2.5 — Limitation of Liability: Cap at fees paid in preceding 12 months, exclusion of consequential damages*

03 PRIVACY & COOKIE POLICY — DATA HANDLING ARCHITECTURE

Compliance Frameworks: GDPR (EU) 2016/679 · CCPA (California Consumer Privacy Act) · UK GDPR

Data Minimisation Principle: Seek Wander is designed on a data minimisation by default architecture. We collect only the data strictly necessary to provide the service. We do not build advertising profiles, sell user data, or engage in behavioural tracking beyond what is disclosed in this document.

3.1 Data Categories & Processing Inventory

Data Category	What Is Collected	Processor	Legal Basis (GDPR)	In ZenithAI DB?
Authentication Identity	Email, name, OAuth profile	Clerk, Inc.	Contract	No — Clerk only
Session Tokens	JWT session cookies	Clerk, Inc.	Contract	No — Clerk only
Trip Parameters	Destination, dates, party, pace, budget, dietary, interests	Supabase (ZenithAI)	Contract	Yes — Trip.itinerary■Data
Generated Itinerary	Full AI-generated JSON blob	Supabase (ZenithAI)	Contract	Yes — Trip.itinerary■Data
Place Cache	Venue name, photo URL, rating, hours, price level	Supabase (ZenithAI)	Legitimate Interest	Yes — PlaceCache (14d TTL)
Cost Telemetry	AI + Google API costs, cache hit rates	Supabase (ZenithAI)	Legitimate Interest	Yes — CostLog (no PII)
Affiliate Click Events	Outbound click destination, partner tracking cookie	Booking.com / Viator	Consent	No — partner only
IP / Device Data	Standard server logs	Vercel Inc.	Legitimate Interest	No — Vercel edge only

3.2 Authentication Data — Clerk v6

All user identity management is delegated entirely to **Clerk, Inc.** Seek Wander stores only the opaque Clerk **userId string** as a foreign-key reference. No passwords, email addresses, OAuth tokens, or session credentials are stored in Seek Wander’s database.

- SOC 2 Type II certified
- GDPR Data Processing Agreement available
- CCPA compliant
- Data stored in US-East (configurable to EU)

■ **PLACEHOLDER:** *Execute and retain a signed Clerk Data Processing Agreement (DPA) prior to any EU market launch or M&A; transaction*

3.3 Third-Party AI Processing — Anthropic

Trip parameters are transmitted to the **Anthropic API** (claude-sonnet-4-6) to generate itinerary content. The following confirms that **no PII is transmitted to Anthropic**:

Field Transmitted	Contains PII?	Notes
Destination name	No	Public place name
Travel dates	No	Date strings only — no user identity
Travel party type	No	Enum: solo / couple / family / group
Pace preference	No	Enum value
Budget tier	No	Enum value
Dietary preferences	No	Enum array
Interests	No	Enum array
User email address	N/A — NOT transmitted	Never sent to Anthropic
Clerk userId	N/A — NOT transmitted	Never sent to Anthropic
IP address	N/A — NOT transmitted	Never sent to Anthropic
Payment information	N/A — NOT transmitted	Never sent to Anthropic

Note: Per Anthropic's API usage terms, API inputs and outputs are not used to train Anthropic models by default (opt-out is the default for API customers). ZenithAI should retain a copy of the executed Anthropic API agreement confirming this position.

3.4 Data Retention & Deletion

Data Type	Retention Period	Deletion Mechanism
Trip records	Indefinite (user-deletable)	User account deletion → cascade delete
PlaceCache	14 days from last access	Automated Vercel Cron (/api/cron/cleanup), daily 00:00 UTC
CostLog	24 months	Manual admin purge (Phase 9 tooling)
Clerk user data	Per Clerk retention policy	Clerk dashboard / API deletion
Vercel access logs	30 days	Vercel platform policy

3.5 User Rights (GDPR Articles 15–22)

Right	Legal Basis	Mechanism
Access (Art. 15)	GDPR Art. 15	Export of Trip records associated with Clerk userId
Rectification (Art. 16)	GDPR Art. 16	Trip data correction via support request
Erasure / Right to be Forgotten (Art. 17)	GDPR Art. 17	Account deletion → all Trip and CostLog rows with matching userId deleted

Right	Legal Basis	Mechanism
Portability (Art. 20)	GDPR Art. 20	JSON export of saved itineraries
Objection (Art. 21)	GDPR Art. 21	Opt-out of CostLog telemetry (unauthenticated mode)

■ **PLACEHOLDER:** *Privacy contact email — e.g. privacy@zenithai.com — must be published in the live Privacy Policy*

04 FTC AFFILIATE DISCLOSURE STRATEGY

Regulatory Basis: FTC Endorsement Guides (16 CFR Part 255), updated 2023. The FTC requires that any material connection between a publisher and a commercial partner be clearly and conspicuously disclosed.

4.1 Applicability

Seek Wander earns commissions when users click affiliate links to partner platforms and complete qualifying bookings. This constitutes a **material connection** between Seek Wander and its affiliate partners under FTC guidelines. Disclosure is legally mandatory.

4.2 Disclosure Standard — "Clear and Conspicuous"

- **Prominent:** Not buried in fine print or hidden in a footer requiring extensive scrolling.
- **Understandable:** Written in plain language accessible to a general consumer.
- **Near the recommendation:** Placed in close proximity to the affiliated link — not solely on a separate policy page.
- **Present on every page** where affiliate links appear — a single sitewide footer disclosure is insufficient.

4.3 Approved Disclosure Language

Standard (footer / persistent):

"Seek Wander is reader-supported. When you book through our luxury curation links, we may earn an affiliate commission at no additional cost to you."

Enhanced (itinerary generation page / inline):

"Our curated recommendations include partner links. If you book through them, Seek Wander may earn a commission — this never influences our editorial curation."

Email / Social (condensed):

"[Ad] [Affiliate] — Seek Wander earns a commission on qualifying bookings."

4.4 UI Placement Requirements

Surface	Required	Placement Specification	Status
Itinerary Generation (/itinerary)	Yes — Mandatory	Persistent banner above first affiliate link	PENDING
Saved Trip Viewer (/trips/[id])	Yes — Mandatory	Inline notice adjacent to booking CTA buttons	PENDING
Public Shared Itinerary (/shared/[id])	Yes — Mandatory	Above the fold — before any affiliate links	PENDING
Site Footer (all pages)	Yes — Mandatory	Persistent text, min 12px, high contrast	PENDING

Surface	Required	Placement Specification	Status
Email Newsletters	Yes — Mandatory	First paragraph of any email with affiliate links	PENDING
Social Media Posts	Yes — Mandatory	#ad or #affiliate in first line of caption	PENDING

4.5 Editorial Independence Statement

ZenithAI affirms that affiliate commission arrangements do not influence the AI-generated itinerary content. The Anthropic model receives no information about affiliate relationships and cannot weight recommendations toward commercially advantageous venues. The buildPrompt() function and SYSTEM_PROMPT contain no affiliate-driven ranking instructions. This separation is a key compliance and credibility asset and should be highlighted to affiliate programme compliance reviewers.

05 VENDOR ACCEPTABLE USE POLICY COMPLIANCE

5.1 Anthropic Acceptable Use Policy

Reference: Anthropic Usage Policy (anthropic.com/legal/aup), current version.

5.1.1 Confirmed Compliant Use Cases

Use Case	AUP Status	Notes
Luxury travel itinerary generation	PERMITTED	Creative content generation
JSON-structured output generation	PERMITTED	Standard structured output use
Personalised recommendations based on user preferences	PERMITTED	Non-sensitive personalisation
System prompt injection defence (SYSTEM_PROMPT)	PERMITTED	Standard responsible AI deployment

5.1.2 Restricted Use Case Non-Violations

ZenithAI affirms that Seek Wander does **not** use the Anthropic API for any of the following restricted categories:

Restricted Category	Status	Evidence
Medical diagnosis or clinical advice	NOT APPLICABLE	Travel domain only
Legal advice or legal document generation	NOT APPLICABLE	Travel domain only
Financial advice or investment recommendations	NOT APPLICABLE	No financial content
Automated high-stakes decisions without human oversight	NOT APPLICABLE	Output is editorial; all bookings made independently by user on third-party platforms
Surveillance, tracking, or profiling of individuals	NOT APPLICABLE	No PII passed to API; no profiling use case
Generation of deceptive content	NOT APPLICABLE	AI Output Disclaimer mandates independent verification
Automated political influence or spam	NOT APPLICABLE	Travel content only
Weapons, CBRN, or dangerous materials	NOT APPLICABLE	Not applicable

5.1.3 Model Version & Token Usage

Parameter	Value
Model	claude-sonnet-4-6
Max Tokens Per Request	8,192
Input Pricing	\$3.00 / 1M tokens
Output Pricing	\$15.00 / 1M tokens

Parameter	Value
Average Cost Per Generation	~\$0.08–\$0.14 (logged in CostLog)

5.2 Google Maps Platform — Terms of Service Compliance

Reference: Google Maps Platform Terms of Service, Section 3.2.3(a). Permits temporary performance caching of place data subject to: cache must be temporary; data must be kept current; data may not be used to build a competing database.

5.2.1 PlaceCache Implementation — Compliance Mapping

Google Requirement	Seek Wander Implementation	Compliance
Temporary caching only	PlaceCache.updatedAt — 14-day rolling TTL enforced by automated Vercel Cron Job (/api/cron/cleanup) running daily at 00:00 UTC	COMPLIANT
Data kept current	prisma.placeCache.deleteMany({ where: { updatedAt: { lt: fourteenDaysAgo } } }) — stale records purged automatically	COMPLIANT
Not used as competing database	PlaceCache stores enrichment metadata for rendering itinerary cards only — not distributed, indexed, or exposed via any API	COMPLIANT
No speculative pre-fetching	enrichPlace() is invoked only per user-initiated itinerary generation — zero background pre-fetching	COMPLIANT

5.2.2 API Key Architecture Compliance

Key Type	Variable	Restriction Applied	Status
Client-side	NEXT_PUBLIC_GOOGLE_MAPS_API_KEY	HTTP Referrer restricted to production Vercel domain + localhost:3000	COMPLIANT
Server-side	MAPS_SERVER_KEY	API restriction: Places API only. Application restriction: None (server-to-server — no referrer header present)	COMPLIANT

Key Storage: MAPS_SERVER_KEY is stored as a Vercel encrypted environment variable, never exposed to the browser or included in any client-side bundle.

■ **PLACEHOLDER:** Confirm Google Maps attribution logo is not suppressed by custom CSS on any map view (QA required before launch)

5.3 Other Vendor Compliance Positions

Clerk (Authentication)

- Used exclusively for user authentication — no identity data replicated outside Clerk’s managed infrastructure.
- Clerk v6 pinned in package.json — v7 is incompatible with Next.js 14.
- Modal sign-in mode — no dedicated redirect sign-in pages required, minimising attack surface.

- All routes are public by default — access control implemented at page/component level.

Supabase (Database)

- SOC 2 Type II certified, GDPR-compliant, EU data residency available.
- Data encrypted at rest (AES-256) and in transit (TLS 1.2+).
- No raw SQL executed — all queries via Prisma ORM with typed schema.
- Dual connection URL: PgBouncer (port 6543) for runtime; direct (port 5432) for Prisma migrations.

Vercel (Infrastructure)

- Processes HTTP request/response data for routing and edge serving.
- Environment variables encrypted at rest.
- No access to Supabase database, Anthropic API, or Clerk user data.
- Cron job scheduling for /api/cron/cleanup (vercel.json configuration).

06 COMPLIANCE CERTIFICATION MATRIX

6.1 Current Compliance Status

Compliance Area	Standard / Requirement	Status	Notes
Input Validation	Zod schema — all API POST bodies	LIVE	ItinerarySchema.safeParse() in route.ts
Prompt Injection Defence	Anthropic system parameter isolation	LIVE	SYSTEM_PROMPT constant
HTTP Security Headers	OWASP baseline headers	LIVE	next.config.mjs headers()
API Key Restriction	Google Maps Platform key split	LIVE	Referrer + API restrictions applied
Authentication	Clerk v6 (SOC2 certified)	LIVE	All sessions managed by Clerk
IDOR Prevention	Ownership check on all private routes	LIVE	trip.userId !== userId → notFound()
Database Encryption	At rest + in transit	LIVE	Supabase AES-256, TLS 1.2+
PlaceCache TTL	14-day automated purge	LIVE	Vercel Cron (/api/cron/cleanup)
Admin Route Security	ADMIN_USER_ID env gating + neutral 404	LIVE	/admin/metrics
Cron Job Security	CRON_SECRET Bearer token auth	LIVE	/api/cron/cleanup
FTC Disclosure	Affiliate disclosure in UI	PENDING	Required before affiliate launch
Cookie Consent Banner	GDPR/CCPA consent management platform	PENDING	Required before EU launch
Rate Limiting	Upstash Redis slidingWindow	PENDING	Phase 9 — pre-monetisation
GDPR DPA — Clerk	Signed Data Processing Agreement	PENDING	Required before EU market launch
GDPR DPA — Supabase	Signed Data Processing Agreement	PENDING	Required before EU market launch
GDPR DPA — Anthropic	Signed Data Processing Agreement	PENDING	Required before EU market launch
ToS — Attorney Review	Complete Terms of Service document	PENDING	Framework defined in this document
Privacy Policy — Attorney Review	Complete Privacy Policy document	PENDING	Framework defined in this document
Content Security Policy	CSP headers	DEFERRED	Would break Google Maps JS SDK + Clerk

Compliance Area	Standard / Requirement	Status	Notes
HSTS	Strict-Transport-Security header	DEFERRED	Vercel enforces HTTPS at the edge

6.2 Pre-Monetisation Compliance Checklist

The following items must be completed **before** enabling affiliate monetisation or processing any payments:

#	Action Item	Owner	Due Date
1	Implement FTC affiliate disclosure on all itinerary-generating and trip-viewing pages	[TBD]	[TBD]
2	Deploy cookie consent banner (GDPR/CCPA compliant CMP — e.g., OneTrust, Cookiebot)	[TBD]	[TBD]
3	Implement rate limiting (Upstash Redis — 5 generations per user per hour)	[TBD]	[TBD]
4	Execute attorney-reviewed Terms of Service and publish at permanent URL	[TBD]	[TBD]
5	Execute attorney-reviewed Privacy & Cookie Policy and publish at permanent URL	[TBD]	[TBD]
6	Sign Clerk GDPR Data Processing Agreement	[TBD]	[TBD]
7	Sign Supabase GDPR Data Processing Agreement	[TBD]	[TBD]
8	Sign Anthropic API GDPR Data Processing Agreement	[TBD]	[TBD]
9	Register with Booking.com Affiliate Programme and retain signed programme agreement	[TBD]	[TBD]
10	Register with Viator Affiliate Programme and retain signed programme agreement	[TBD]	[TBD]
11	Confirm Google Maps attribution logo is visible on all map views (QA sign-off)	[TBD]	[TBD]
12	Establish privacy contact email (e.g., privacy@zenithai.com) and publish in Privacy Policy	[TBD]	[TBD]

This document is prepared for Data Room purposes only. It does not constitute legal advice. ZenithAI should engage qualified legal counsel in the relevant jurisdiction(s) for review and formalisation of all agreements, policies, and compliance programmes referenced herein.

Document Classification: Confidential — ZenithAI Data Room · Version 1.0 · March 2026 · Next Review: September 2026 or upon material product change
